

## Interactive Class Room Sessions

In the pre-technology education context the teacher is the sender, the educational material is the information and the student is the receiver of the information. In terms of the delivery medium, the educator can deliver the message via the “chalk-and- talk” method and LCD projector transparencies. This learning perspective is a popular technique, which has been used for decades as an educational strategy in all institutions of learning. Basically, teacher controls the instructional process, the content is delivered to the entire class and the teacher tends to emphasize factual knowledge.
