CALLING ALL SPEEDCUBERS

Fastest fingers first

**PAVAN KUMAR AKULA
TELLS US WHAT IT
TAKES TO MASTER
THE RUBIK'S CUBE**

KOTA SAUNYA

Most of us, at some point in our life, would have tried to solve a Rubik's Cube. And, many may have given up trying to find a solution to the seemingly unsolvable scramble. But, there is that small segment of individuals made of a 'genetically superior' material who can make sense of this

These superior beings are called speedcubers, and Pavan Kumar Akula is one such speedcuber right here in the city. The 25-year-old has been around the cubing block for quite some time now, who has seriously started cubing in 2010 and won several competitions and awards.

World champion

However, things took a definite U-turn when he became World Champion in 2012 by 3' speedcubing competition with a 100 per cent success ratio in blind-folded category in 2012. Besides him, only two other individuals to achieve that feat at the time were Tim Habermas from Germany and Mats Bergsten from Sweden.

After that, this BTEch graduate

from the Mahatma Gandhi Institute of Technology started watching YouTube videos and learning the different techniques involved. Mastering the techniques was not an easy process and it took hours of practice spread over days.

So begins the journey...

His world title also got him the attention of World Cube Association (WCA), the governing body of Rubik's Cube competitions which gave him the designation of a delegate. And, so began his journey into the world of cubes. Interestingly, there are only five such speedcubers in India who are recognised by WCA.

In Hyderabad, Pavan runs Decan Cubing, an association he started in August 2017 for Rubik's Cube aficionados like him. Now, he, along with a six-member core team, conducts workshops and competitions in private institutes and schools teaching students as young as six.

"For children

below six, we start them off easy with a pyramid puzzle and for others, we tell them about the cube as a concept and give them a 3 by 3 cube to solve. We also tell them about the importance of solving it more than crushing against time," explains Pavan who has also won a place in the Limca Book of Records for making 'the largest cube mosaic of Bhagat Singh' with the help of 8,000 Rubik's Cubes in 2013.

Multi-layered tests

Categories are aplenty in this field, like working a 2x2, 4x4, 6x6, 7x7, one-handed solve, fewest moves, multi-blind and other shapes such as the megaminx and pyraminx. These not only test a person's cognitive thinking, but also spatial intelligence, decision-making and analytical skills, apart from short-term and long-term memory.

Not content to do routine stuff, Pavan also attempted a Guinness World Record in 2016 by solving the cube while hanging upside down in 30 seconds. He managed that in 1748 seconds. He does admit that there is a growing number of cube solvers in the city, but many are unaware about the competitive side to it. "We are now preparing to take part in the Indian Nationals in Mumbai which will be held on May 25," adds Pavan.

Strategy to Support Innovation and Entrepreneurship at Geethanjali College of Engineering and Technology (GCET)

- Conduct sessions through workshops/webinars/seminars/lectures by eminent speakers/resource persons from Industry and academia, and identify students with innovative ideas through campaigning which can culminate into innovative projects, and provide seed fund to the project for creating a working model/prototype, which shall be carried out in the incubation cell of the college.
- To bring more number of students under the umbrella of student innovations and student entrepreneurship, a course/laboratory course on 'design thinking' may be introduced across all disciplines.
- The college has established an Entrepreneurship Development Cell (EDC) in collaboration with National Entrepreneurship Network (NEN) cell (guided by Wadhvani Foundation) which shall work in coordination with the incubation cell.
- Students are encouraged to take up their mini/major project with an incubator (University/College/Govt Recognized). They shall take prior approval from respective department to which the student belongs to and shall complete all requirements such as project reviews and project report submission etc. to earn credits as per the university/college regulations.
- The student may opt to present their innovation/Startup idea/patent draft for Seminar/Technical paper writing components as per the course structure and earn credits as per the regulations.
- GCET shall consider a maximum of 10% of concession in attendance for student participation in Innovation/Startup events and incubator programs. However, prior grant of leave and proof of participation is mandatory to consider attendance for the period in consideration and can be availed only once at any stage of company formation.
- Students are encouraged to opt courses through NPTEL or any MOOCs.
- Assistance in legal and financial services shall be given for startup companies established by students and/or faculty.
- GCET shall facilitate and train the startups for pitching to venture capital funds/investors, in collaboration with other incubators, if required.

Dear Sir/Madam,

In continuation to the mail from DAP JNTUH, it is to inform that JNTUH is organizing a 4 week Summer Product Engineering Workshop EXCITE-2017 during May/June, 2017. EXCITE is a workshop to discover, nurture and refine technical product ideas and entrepreneurship among the Engineering students. The program guides in a structured manner engineering students pursuing B.tech(III year) in JNTUH constituent and affiliated colleges to develop tech product ideas. The innovative student ideas would be selected for mentoring by start-ups from HYSEA (Hyderabad Software Enterprises Association). An important outcome of the workshop is a demo prototype of their innovative ideas. Pl find the Guidelines enclosed .

EXCITE-2017 is third in the series organized by JNTUH and is scheduled between May 15, 2017 and June 16 2017. The last date for registration in extended to 25th April, 2017.

G. Vijaya Kumari

Professor
Dept. Of Computer Science & Engg
JNTU College of Engg, Kukatpally

EXCITE Guidelines for Participating Colleges and Students

1. The Nomination form has to be filled by the Head of the Institution or an authorized person
2. The Nomination form should be filled on or before 20th April 2017
3. The students nominated in the form should be willing to complete the whole duration of the programme. The whole team will be disqualified if any student in the team is irregular due to any reasons.
4. We are introducing an option of nominating two teams from Third Year (completed writing exams for third Year) and one team from Second year (completed writing exams for Second Year).
5. The technology tracks in focus for EXCITE 2017 are IoT, Deep technologies like Artificial Intelligence, Machine learning, Augmented Reality/Virtual reality
6. The programme lays strong emphasis on self-learning, Peer learning. So while there will be a few technology workshops, it is expected that the participants work on their own. This is not a training programme.
7. We request the respective departments to do validation of ideas and make sure the ideas described in the form have a clear indication of the following :
 - Problem being solved
 - Current solution to the problem
 - Proposed solution (Innovation)
 - Target Customer
8. Please encourage your students to consider the following points before proposing the idea:
 - Is it a significant problem which needs to be solved
 - Who will pay for the solution
 - Is there a major innovation in the proposed solution
 - Is there a big market for the solution
 - Does the solution impact in a big way
 - Is the solution based on sound technology principles/standards and is it feasible to implement
9. It would further be appreciated if they do a quick validation of their idea with target customer base.

The Geethanjali College Mobile
App Project

The Prevalent System

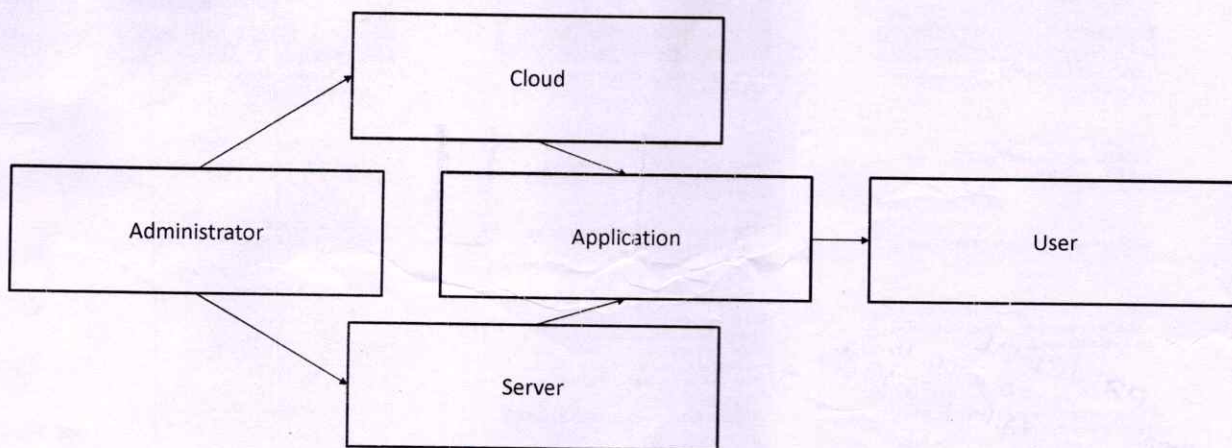

- The Current mode by which students acquire information relayed by the college administrators or management was through modes that remain outdated for its time.
- The Geethanjali Institutions Website and the Student-run GCTC portal have played a major role as chief distributors of information of all sorts encompassing Announcements, Results, Admin details, Placement notifications etc.
- Although they were quite efficient in their own aspects ,Students had to connect to a browser and constantly check the websites for updates which was ,needless to say, time consuming.

The Navigation Drawer

The other sections of the app include segregated Portions of the announcements wherein each section could be explained as follows:

- ❖ Admin – Holds announcements made by the College Admin Section which includes Transport details, Fee Announcements and Exam notifications.
 - ❖ Attendance – Holds Attendance details. Connects to winnou.net/Geethanjali college.
 - ❖ Placements – Holds Placement Announcements.
 - ❖ Results – Holds the database of recently released results.
 - ❖ Department – Holds department specific announcements.
 - ❖ Fests – Holds Fest related announcements.
 - ❖ Sports – Holds Sports related announcements.
- ❖ Feedback section – This section is used to send a feedback on the apps performance directly to the Application developers.

The Results tab holds the database of the recently released results which the students can assess by entering their Roll number in their specific year's tab.

Subject: Permission to upload the Geethanjali college app into the Google Play Store.

Sir,

We the members of the Innovation Center of Geethanjali College of Engineering and Technology are glad to inform you that the testing phase of the Mobile App is nearing its end. However, to further test the app's deployment and connectivity we must buy a platform in the Google play store with the name "**GEETHANJALI INSTITUTIONS**" to distribute it to a larger student-base. To create the platform in the Google Play Store and upload the app would require a onetime payment of **25 USD**. Therefore, we kindly request you to give us permission to upload the app and proceed further with the deployment phase and reimburse the same once we upload.

Thanking you.

Yours sincerely,

Dear SPoCs,

Thank you for the overwhelming response to the submission of ideas by your students for the central hackathon. we have received more than 200 ideas. A panel of mentors shall validate and shortlist the ideas based on the relevance of theme (Cyber-Physical Systems), uniqueness and novelty of Idea and other relevant parameters.

The shortlisted teams will be intimated by Thursday morning. Teams which are shortlisted are invited to participate in a two-day bootcamp on IoT with LoRa Technologies at JNTUH campus on Friday and Saturday (16th -17th Feb). The bootcamp shall help to enhance the practical knowledge of students by giving them hands-on learning experience and further refine their ideas for Hackathon

More detailed inputs on inventory that students should carry for the bootcamp and detailed instructions will be mailed shortly.

any queries, feel free to mail at info@j-hub.in

regards
Team J-Hub

A cyber-physical system (CPS) is a mechanism that is controlled or monitored by computer-based algorithms, tightly integrated with the Internet and its users.

Examples of CPS include

- Smart grid
- Autonomous automobile systems
- Medical monitoring
- Process control systems
- Robotics systems
- Automatic pilot avionics
- Industrial IoT

IoT –LoRa
EDGE computing

DECCAN CUBING

Title: Permission for conducting a competition

Date: 21/12/2017

To,

The Principal,

Geethanjali college of engineering and technology.

Respected Sir,

We would like to Conduct an International Rubik's Cube Competition in college in Coordination with the students. The Competition will be managed by Deccan Cubing.

Support we required from college.

- 1) Two Student Coordinators
- 2) Auditorium or big hall which will be used as competition area.
- 3) 15-20 Volunteers from college.

All the Required Equipment for the competition will be provided by Deccan Cubing and other delegates From India

- 1) Stack mat timers, Stopwatches, Cube covers.
- 2) Additional Stationary
- 3) Banner and Certificates For participants, volunteers and winners.
- 4) Memento or Medals for all the Winners.

All the competition requirements will be discussed with the Student Coordinators.

Best regards,

Pavan Kumar Akula

Idea

- **Idea** is a thought or collection of thoughts that generate in the mind.
- An idea is usually generated with intent, but can also be created unintentionally.
- Ideas often form during brainstorming sessions or through discussions.

Creativity

- **Creativity** is about *unleashing the potential* of the mind to conceive new ideas.
- Creative ideas can also be thought experiments within one person's mind.
- Creativity is subjective, making it hard to measure.

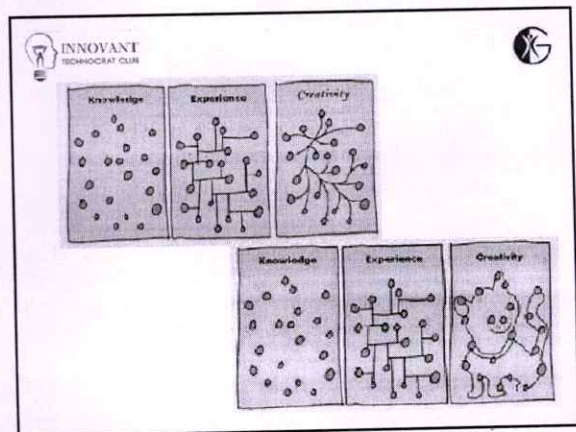

Innovation

- **Innovation** is an act of application of new ideas to which creates some value for the business organization, government, and/or society at large.
- Better and smarter way of doing anything is innovation.
- Innovation is about introducing change into relatively stable systems.
- Innovation is completely measurable.

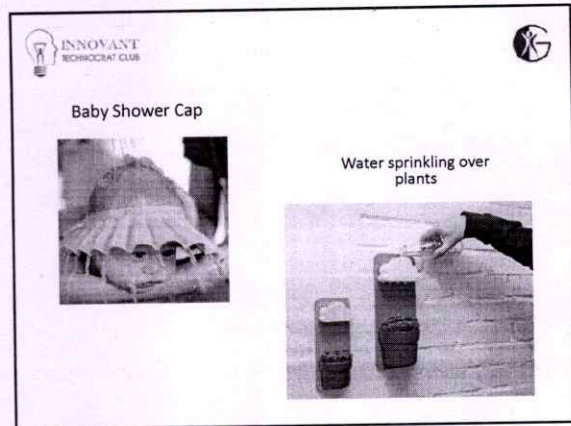

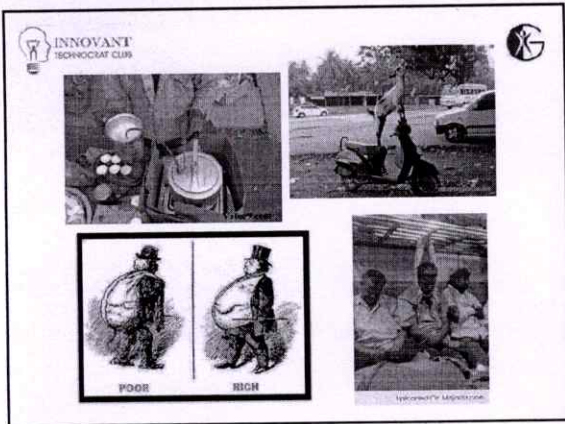

Creativity Vs Innovation

BASIS FOR COMPARISON	CREATIVITY	INNOVATION
Meaning	Creativity is a act of creating new ideas, imaginations and possibilities.	Innovation is the introduction of something new and effective into the market.
Process	Imaginative	Productive
Quantifiable	No	Yes
Related to	Thinking something new	Introducing something new
Money Consumption	No	Yes
Risk	No	Yes

5 Stages of Creative Process

- **preparation**
 - (preparatory work on a problem that focuses the individual's mind on the problem and explores the problem's dimensions)
- **incubation**
 - (where the problem is internalized into the unconscious mind and nothing appears externally to be happening)
- **intimation**
 - (the creative person gets a "feeling" that a solution is on its way)
- **illumination or insight**
 - (where the creative idea bursts forth from its preconscious processing into conscious awareness)
- **verification**
 - (where the idea is consciously verified, elaborated, and then applied).

Light – Solar powered

- Liter of Light is a global open source movement with the aim to provide an ecologically and economically sustainable source of light. The aim is to provide light to underprivileged households that do not have access to electricity or are unable to afford it. The invention is relatively simple. It involves filling up a 1.5L PET bottle with purified water and bleach and installing it onto the roof of a house. The water inside the bottle refracts the sunlight during the daytime and creates the same intensity as a 55 watt light bulb. With the correct installation and materials a solar bottle can last up to 5 years. As the light relies on the sun it cannot be used at night and is only meant to provide light to buildings and homes during daylight hours.

Mitti Cool

Mansukh Prajapati, a potter, came up with this terrific idea of a building a clay refrigerator for people who cannot afford refrigerators. Called as the Mitti Cool fridge, the contraption measuring 18.5 inch in height and 11 inch in width has two water tanks – one each at the top and the bottom. The working of the fridge is similar to that of clay pots used in rural areas, ones that keep water cool in the summers. It requires neither electricity nor any artificial form of energy so reducing recurring costs to zero. MittiCool's total costs in around Rs. 2000/-, which is almost 80% lesser than conventional refrigerator.

Zing Wickets

- The Zing wickets have LED lights which can determine whether the wicket is broken (when the balls are completely dislodged from the stumps).
- The balls have an inbuilt sensor (sensitive to radio waves) that can determine within 1/1000 of a second when the wicket is broken. If the wicket is broken, the balls will flash bright red LED lights. They will then send radio signals to the stumps which will also start flashing the red light.
- Talking of the cost, these LED lights are powered by low voltage batteries, which are integrated in each of the balls as well as the stumps, which is 100 times better than a Snickometer, which uses a hot spot technology, using 2 cameras that requires a \$600 per day of a match!!

PROBLEM STATEMENT

It is the most common problem faced by people in their day to day life. People travelling long distances would commonly face this issue.

"As a rule, the charging voltage with the engine at fast idle should usually be about 1-1/2 to 2 volts higher than battery voltage..An alternator failure will cause the battery to run down and go dead . Symptoms of charging problem include a low battery, dim headlights, hard starting or a charging system warning light."

PROBLEM STATEMENT:

- The general ways of producing electricity is from renewable sources of energy like the thermal energy which may soon disappear. Production of thermal energy also causes lot of atmospheric pollution and damages the environment and results in the destruction of ozone layer. So we need some alternative sources to produce the energy. This could be done by the sounds around us.

ABSTRACT:

- We come across various sounds in our daily life. These sounds are generally in the audible range and hence have a good intensity of vibration in the atmosphere. These sounds can be used to produce the electricity. The sounds can be trapped and forced onto the piezoelectric crystals which produce electricity when hit by mechanical forces.

ABSTRACT:

SOLUTION:

- The best way to produce electricity at cheaper rates is by using the waste sounds which are disturbances in the ear. These sounds can be trapped with the help of the microphones and then forced onto the piezo electric crystals which produces the energy. This energy is then multiplied by the capacitors and resistors which can constantly multiply the varying input.

POWER GENERATION THROUGH Automobiles

PRINCIPAL

Cheerupudi (V), Keesara (M), R.R. Dist. (A.P.) - 501 301

ABSTRACT:

- We come across various sounds in our daily life. These sounds are generally in the audible range and hence have a good intensity of vibration in the atmosphere. These sounds can be used to produce the electricity. The sounds can be trapped and forced onto the piezoelectric crystals which produce electricity when hit by mechanical forces.

ABSTRACT.

SOLUTION:

- The best way to produce electricity at cheaper rates is by using the waste sounds which are disturbances in the ear. These sounds can be trapped with the help of the microphones and then forced onto the piezo electric crystals which produces the energy. This energy is then multiplied by the capacitors and resistors which can constantly multiply the varying input.

PRINCIPAL
Geethanjali College of Engg. Tech.
Cheerthi (V), Keesara (M), R.R. Dist. (A.P.) - 501 301

DESIGN FOR SOLUTION:

- The major components required are:
 1. 10 micro farad capacitors 3
 2. 100 ohm resistors 3
 3. 10 ohm resistor
 4. Piezo electric crystal
 5. Ucc 28600 ic
 6. Micro phone.

COMPLETION REPORT:

- Completed the purchase of all the equipment.
- Will be assembling the circuit in short time and then proceed for the testing stage.

4/28/18, 20:01 - â€+91 80081 11014â€: *Workplace rules for happy life:*

1. *Trust no one* but respect everyone.
2. What happens in office, remain office. *Never take office gossips* to home and vice versa.
3. *Enter office on time, leave on time*. Your desktop is not helping to improve your health.
4. *Never make Relationships* in the work place. It will always backfire.
5. *Expect nothing*. If somebody helps, feel thankful. If not, you will learn to know things on your own.
6. *Never rush for a position*. If you get promoted, congrats. If not, it doesn't matter. You will always be remembered for your knowledge and politeness, not for your designation.
7. *Never run behind office stuff*. You have better things to do in life.
8. *Avoid taking everything* on your ego. Your salary matters. You are being paid. Use your assets to get happiness.
9. It *doesn't matter how people treat you*. Be humble. You are not everyone's cup of tea.
10. In the end *nothing matters except family*, friends, home, and Inner peace.

5/22/18, 11:43 - â€+91 99666 72730â€-: Q : What is Nipah Virus ?

A : Nipah virus was initially discovered when it caused an outbreak of brain fever among pig farmers in Malaysia.

Q : Should I be worried ?

A : A little. As it is transmitted from person to person and there is no effective antiviral therapy for this infection .

Q : Who is at high risk ? How is it transmitted ?

A : 1. People working with pigs and consuming pigs.

2. Farmers who come in contact with bats.

3. Consuming Fruits-which are already bitten by bat.

4. Contact with people who already have Nipah virus infection.

Q : What are the early symptoms ?

HEXD.

Strengths

- The proven ability to establish excellent personalized client service.
- Strong relationships with suppliers that offer flexibility and respond to special product requirements.
- Good referral relationships with architects, complementary vendors, and local realtors.

Weaknesses

- Not established in a market where a variety of interior design options exist.
- Challenges of the seasonality of the business.

Opportunities

- A significant portion of our target market is desperately looking for the services Hexd will offer.
- Promising activity from new home construction activity.
- Changes in design trends can initiate home updating and, therefore, generate sales.

Threats

- Continued price pressure due to competition or the weakening market reducing contribution margins.
- Dramatic changes in design, including fabric colors and styles can present challenges to keep paced with what is desired by what is expected to be a leading-edge client base.
- Expansion of products and services offered by other sources .

->This analysis indicates solid potential success, but the weaknesses and threats must be recognized throughout the life of the venture

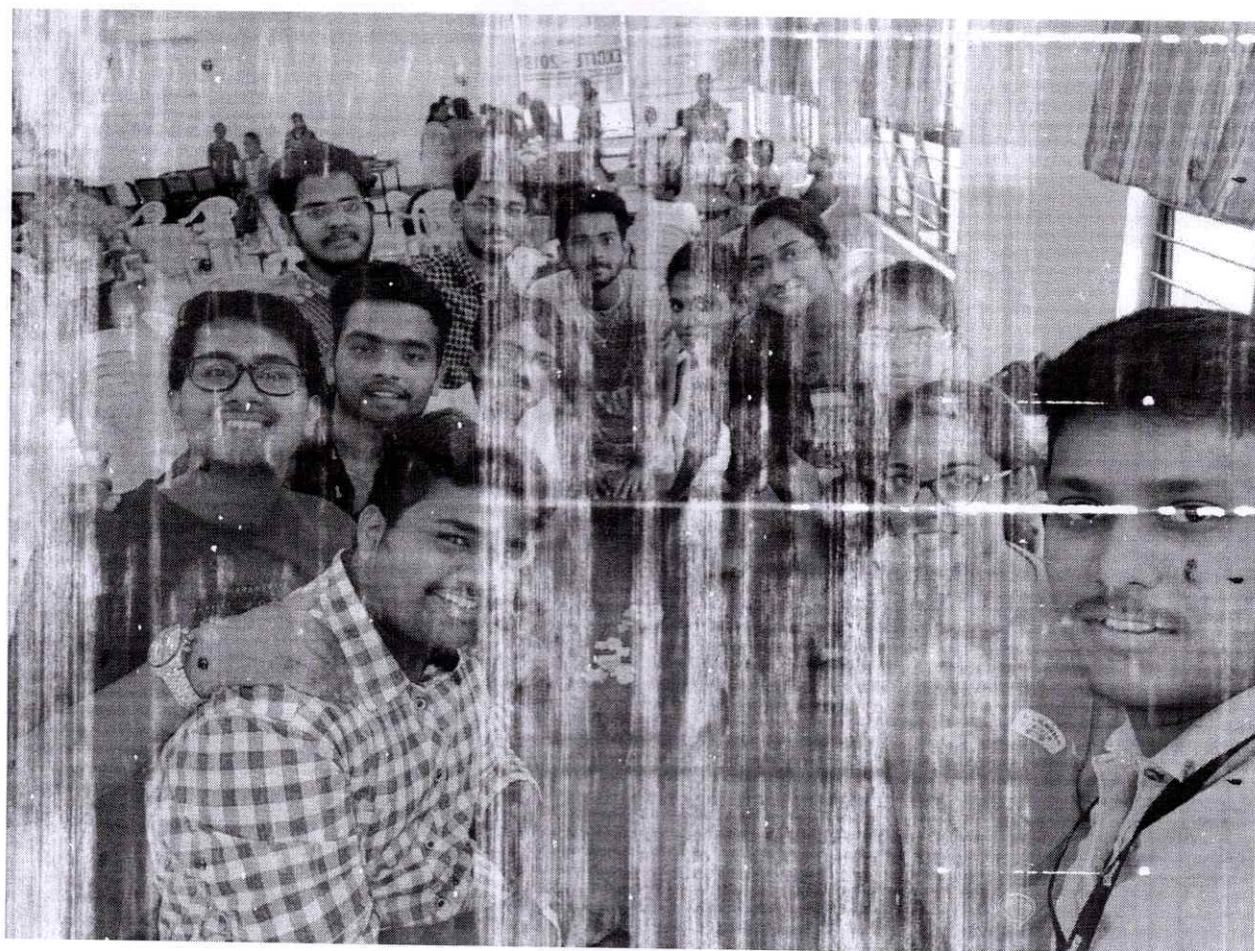

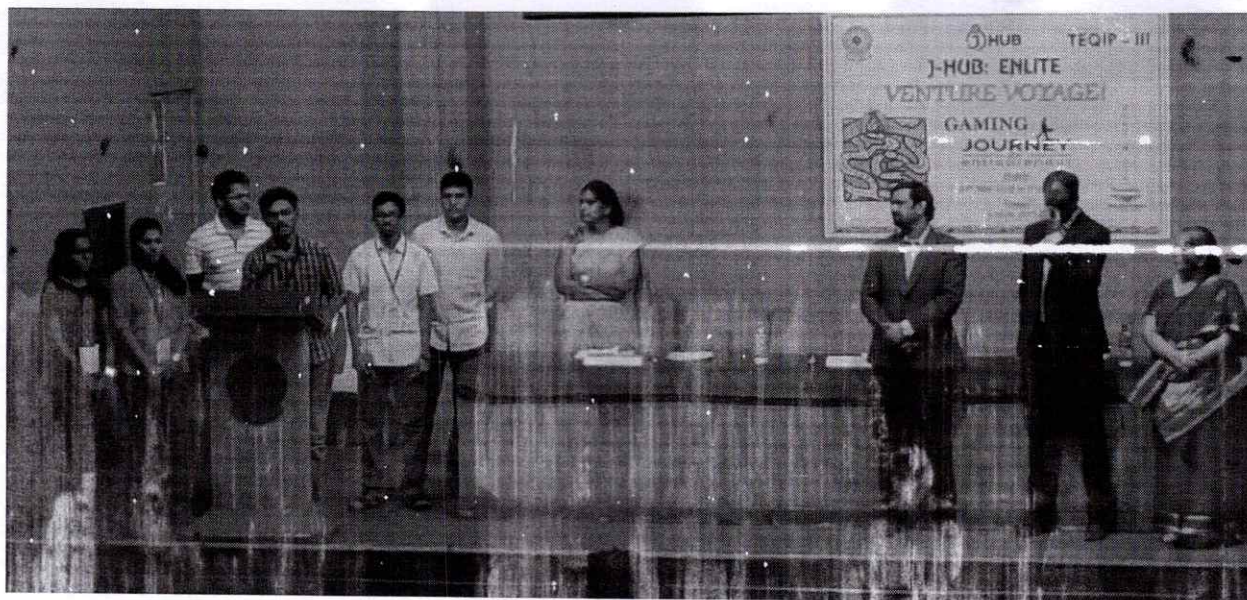

Positioning

- For the person that seeks to create a personalized and unique impression of her home, HEXD is the source for them.
- Clients will be impressed with services they received and outcome they have enjoyed.
- Unlike the other apps HEXD allows the customers/clients to design and furnish the interior and exterior of their house and provides a facility to buy the products online with quality certification.

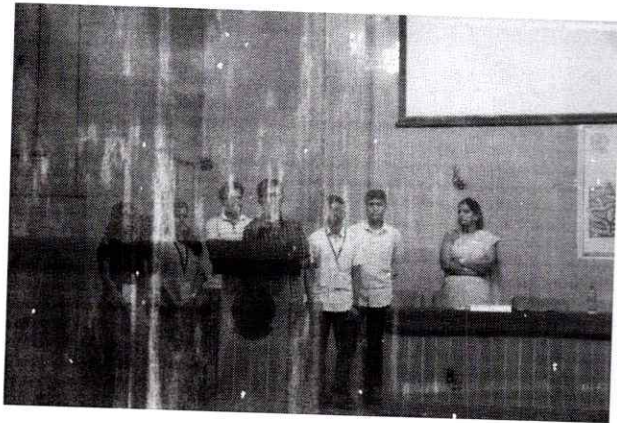

Differentiation

- Chatbots to help customers in every aspect.
- Giving the possibility to buy electronic goods and furniture at a relatively lower price.
- Giving a special package of 50% offer - If the customer subscribes for this

Central Hackathon Idea submission

1 message

jhub.jntuh <jhub.jntuh@gmail.com>

To: j-hub-SPoCs <j-hub-spocs@googlegroups.com>

Tue, Feb 13, 2019 at 9:22 AM

Dear SPoCs,

Thank you for the overwhelming response to the submission of ideas by your students for the central hackathon. we have received more than 200 ideas. A panel of mentors shall validate and shortlist the ideas based on the relevance of theme (Cyber-Physical Systems), uniqueness and novelty of Idea and other relevant parameters.

The shortlisted teams will be intimated by Thursday morning. Teams which are shortlisted are invited to participate in a two-day bootcamp on IoT with LoRa Technologies at JNTUH campus on Friday and Saturday (16th -17th Feb). The bootcamp shall help to enhance the practical knowledge of students by giving them hands-on learning experience and further refine their ideas for Hackathon

More detailed inputs on inventory that students should carry for the bootcamp and detailed instructions will be mailed shortly.

Any queries, feel free to mail at info@j-hub.in

regards
Team J-Hub

Cyber Physical Systems

Theme: Cyber Physical Systems – Industry 4.0

A cyber-physical system (CPS) is a mechanism that is controlled or monitored by computer-based algorithms, tightly integrated with the internet and its users.

Examples of CPS include:

- Smart grid
- Autonomous automobile systems
- Medical monitoring
- Process control systems
- Robotics systems
- Automatic pilot systems
- Industrial IoT

IoT –LoRa
 EDGE computing
 AI
 ML
 AR/VR
 Drones

Launch of Jhub:Jlabs
JNTUH Innovation Hub

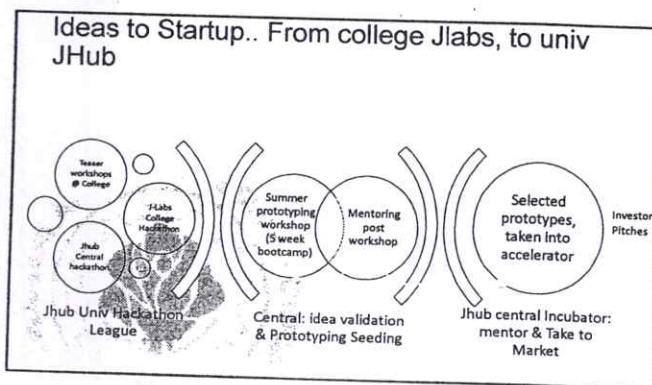

College Registration Guidelines
 Feb 2 2018

Objective: Innovation

- Excitement around innovation
 - Exposure (UG) to interesting products & startups
 - Teaser workshops & seminars
- Create a culture of "building" tech prototypes
 - Ideation, Experimentation, Prototypes
- Create tech product based startups.
 - Idea thru Prototypes
- Hub and Spoke model
 - Central Hub at Univ Campus (Jhub)
 - College level spokes (Jlabs)
 - Students & team from college level, get help from central Jhub
- Jhub will connect with T-Hub, State Innovation Cell and other city enablers

HEXD.

Strengths

- The proven ability to establish excellent personalized client service.
- Strong relationships with suppliers that offer flexibility and respond to special product requirements.
- Good referral relationships with architects, complementary vendors, and local realtors.

Weaknesses

- Not established in a market where a variety of interior design options exist.
- Challenges of the seasonality of the business.

Opportunities

- A significant portion of our target market is desperately looking for the services Hexd will offer.
- Promising activity from new home construction activity.
- Changes in design trends can initiate home updating and, therefore, generate sales.

Threats

- Continued price pressure due to competition or the weakening market reducing contribution margins.
- Dramatic changes in design, including fabric colors and styles can present challenges to keep paced with what is desired by what is expected to be a leading-edge client base.
- Expansion of products and services offered by other sources .

->This analysis indicates solid potential success, but the weaknesses and threats must be recognized throughout the life of the venture

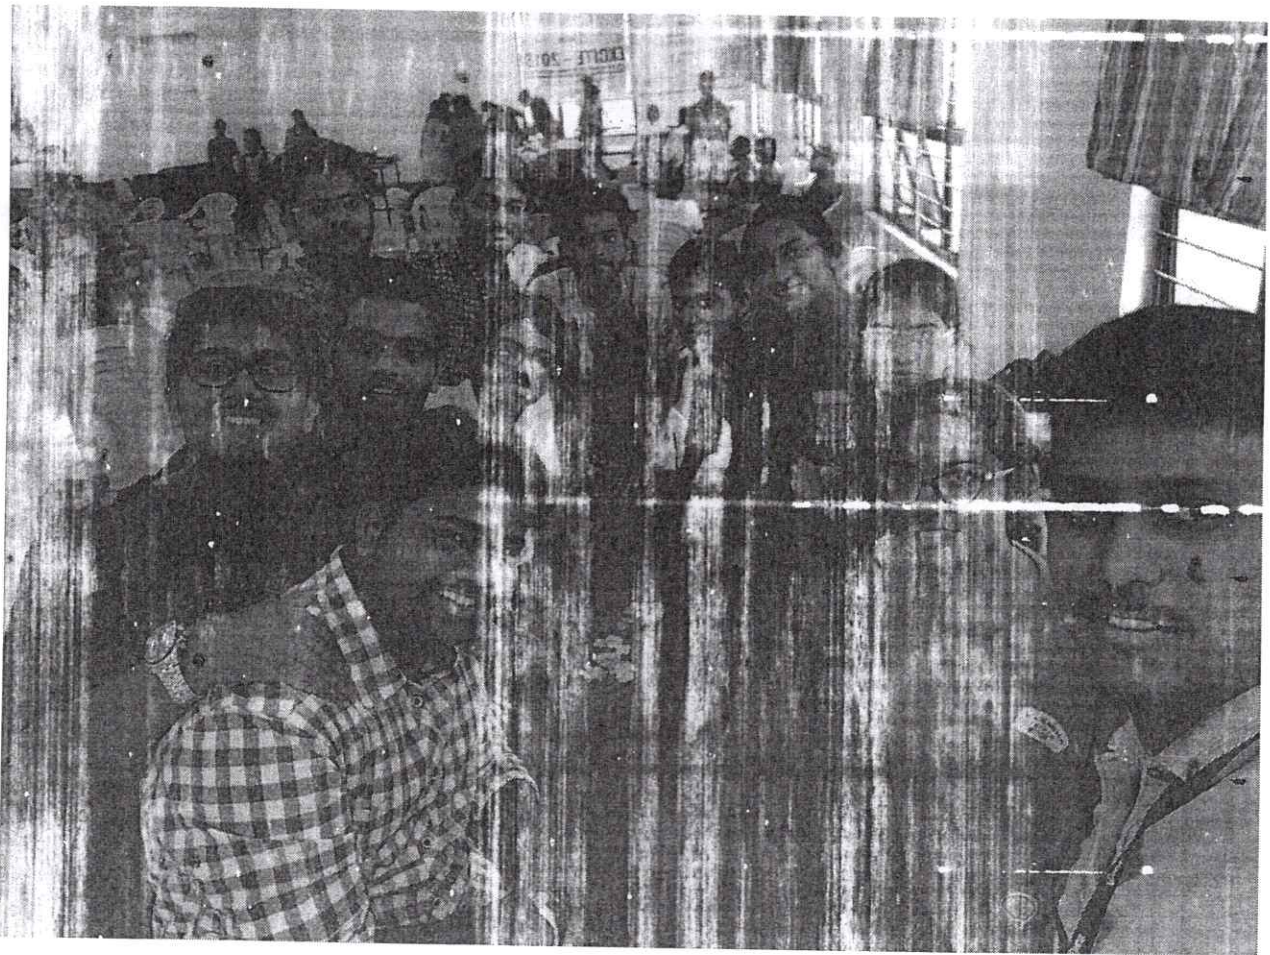

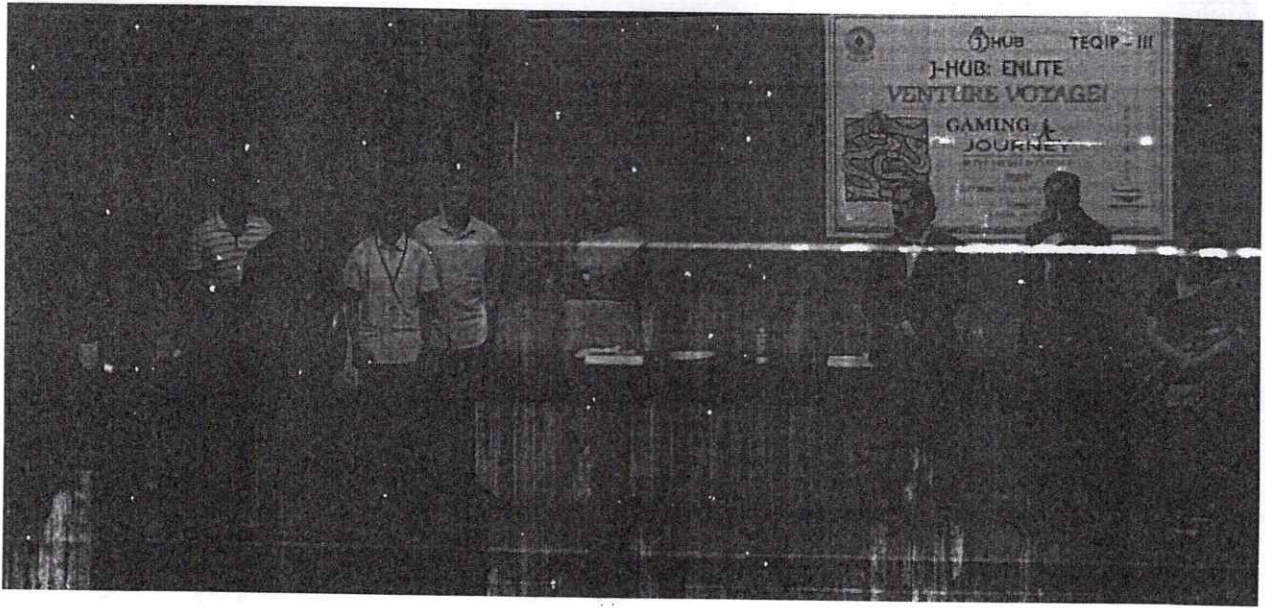

Positioning

- For the person that seeks to create a personalized and unique impression of her home, HEXD is the source for them.
- Clients will be impressed with services they received and outcome they have enjoyed.
- Unlike the other apps HEXD allows the customers/clients to design and furnish the interior and exterior of their house and provides a facility to buy the products online with quality certification.

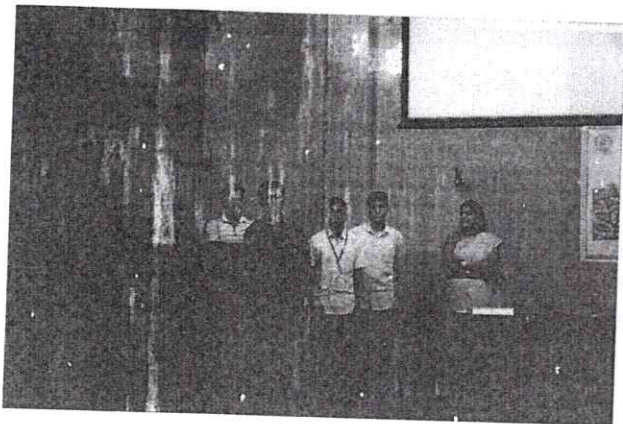

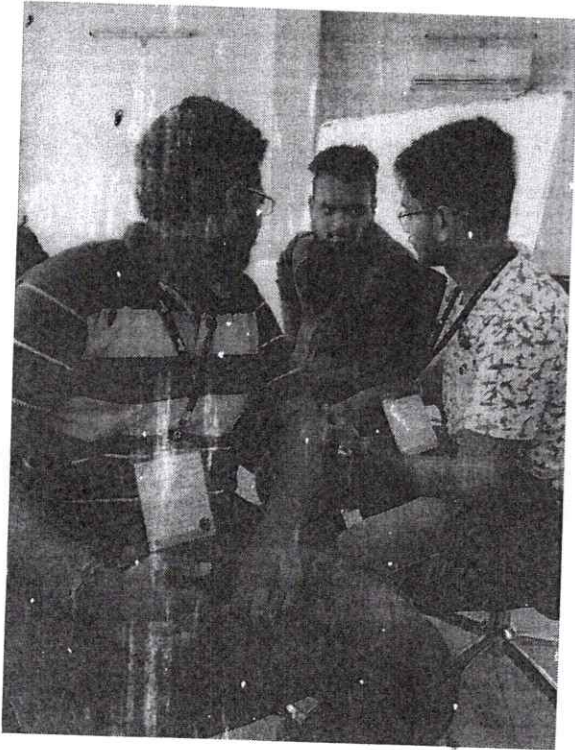

Differentiation

- Chatbots to help customers in every aspect.
- Giving the possibility to buy electronic goods and furniture at a relatively lower price.
- Giving a special package of 50% offer - If the customer subscribes for this

Submission number	Name	email	Phone	Name of College	What Industry /domain does your idea best represent	Describe your idea in less than 100 words
1	K.Ramya Sai	ramyasaik08@gmail.com	8977026440	ACE ENGINEERING COLLEGE	Industrial IOT	A technique is developed to detect manhole covers on the streets. Vehicles on the road have a great impact on the cover detection rate. Using this we can cover the manholes with lid by the arrival of vehicles and we can detect them during floods with signal and inform to municipal office.
12	ROHITH KUMAR KATTA	RROYAL.RK@GMAIL.COM	+919399996636	GRIET	IOT (INTERNET OF THINGS)	The problems that facing by the farmers by natural calamities like floods, THUNDERS, Etc. That which causes most Damages to there life. For that cause we making a device that can work it self without being the farmer. It saves the Electronic device from the Burning, its works like farmer ROBOT.
13	Ganesh Srivatsa Kalahasti	gani.victory@gmail.com	8074592538	ACE ENGINEERING COLLEGE	Medical Monitoring	The main objective of my idea is to keep the human Blood pressure (BP), heart functioning and happening of hypoglycemia being monitored constantly and detect it's abnormality.
15	K Madhumitha Reddy	madhumithareddy@gmail.com	8801090012	JNTUHCEH	Robotics	The HEART of any ROBOTIC ENTITY is the proper control of the DC motors. We intend to create an intelligent cleaning robot which once installed does not need any human monitoring. In this way, one does not have to bother about switching on the robot everyday and be able to keep the surroundings neat.

27	G. Prashanth Kumar	prashanth013196@gmail.com	9700847600	GEETHANJALI COLLEGE OF ENGINEERING AND TECHNOLOGY	Medical Monitoring	In India due to traffic signaling system and various other reasons ambulances are getting late, which results in loss of lives! To this purpose, an advanced traffic signaling system is proposed that is capable of detecting the ambulance from far area and clear the traffic according to the need.
31	ROHAN MAJUMDAR	rhnjmldr669@gmail.com	8333802747	JNTU-JAGTYAL	Medical Monitoring System	Constantly monitoring the patient's Heart beat, Blood Pressure and Temperature from a smart wearable using Bluetooth sensor from the watch. The system will be trained by Anomaly Detection Algorithm by which any anomaly (exceptions) will be detected and alerted to nearest hospital.
33	K.Abhiram Varma	abhiram040@gmail.com	9849558075	GRIET	INDUSTRIAL IOT	Temperature, humidity control had become a major challenge. Our idea is to monitor the industrial temperature and humidity in industries and also use a smart water coolant pumping for machinery. We use two temperature sensors namely DHT11 and DS18B20. Data is pushed to cloud using MQTT protocol.
35	BHARATH KUMAR GOUD SATHURI	sathuribharathbrothers1234@gmail.com	9133430813	Sreenidhi Institute of Science and Technology	Computer Science & Engineering/Natural Language Processing	There is no existing software for generating subtitles for a live video. We are trying to develop a software which generates subtitles for a live video by taking the audio from speech and sending them to cloud to get the text by using speech api and sending text to broadcasting centers to telecast.

Dear Sir/Madam

Dear Sir/Madam

Greetings of the day!

Congratulations for being part of JHub the JNTUH Innovation and Rand D initiative.

This has reference to your institute sign-up to J-HUB, JNTUH Innovation HUB.

The Events of J-Hub are starting from November/December 2017. You are therefore advised to take-up *student registration* to your institution level and prepare them through workshops through NEN and institution level Hackathons for further enablement at J-HUB on selection.

The details are enclosed in the presentation.

Any further queries may please be addressed to this email.

Yours sincerely

Dr. G. Vijayakumari

4/28/18, 20:01 - â€+91 80081 11014â€: *Workplace rules for happy life:*

1. *Trust no one* but respect everyone.
2. What happens in office, remain office. *Never take office gossips* to home and vice versa.
3. *Enter office on time, leave on time*. Your desktop is not helping to improve your health.
4. *Never make Relationships* in the work place. It will always backfire.
5. *Expect nothing*. If somebody helps, feel thankful. If not, you will learn to know things on your own.
6. *Never rush for a position*. If you get promoted, congrats. If not, it doesn't matter. You will always be remembered for your knowledge and politeness, not for your designation.
7. *Never run behind office stuff*. You have better things to do in life.
8. *Avoid taking everything* on your ego. Your salary matters. You are being paid. Use your assets to get happiness.
9. It *doesn't matter how people treat you*. Be humble. You are not everyone's cup of tea.
10. In the end *nothing matters except family*, friends, home, and Inner peace.

5/22/18, 11:43 - â€+91 99666 72730â€-: Q : What is Nipah Virus ?

A : Nipah virus was initially discovered when it caused an outbreak of brain fever among pig farmers in Malaysia.

Q : Should I be worried ?

A : A little. As it is transmitted from person to person and there is no effective antiviral therapy for this infection .

Q : Who is at high risk ? How is it transmitted ?

A : 1. People working with pigs and consuming pigs.

2. Farmers who come in contact with bats.

3. Consuming Fruits-which are already bitten by bat.

4. Contact with people who already have Nipah virus infection.

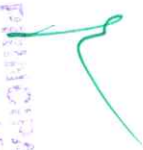

Q : What are the early symptoms ?
